

TECHNICAL DATA SHEET

DC Resin Cadenza-603

GENERAL PRODUCT DESCRIPTION

DC Resin is modified form gum rosin. The resin is a medium-hard, thermoplastic acidic resin. DC Resin is low-cost, has good solubility, compatibility and low crystallisation rate properties.

Appearance Dark translucence solid

PRODUCT SPECIFICATIONS

Product specification	Typical Properties
Colour Gardner color (50% toluene solution):	14max
Softening Point (ball & ring):	85-110°C
Acid Value mgKOH/g:	100-110

FORM OF SUPPLY

225kg net each drums.

USAGE:

The resin has excellent solubility and compatibility properties. It can be used in mastic adhesives, low-cost hotmelt adhesives and related compositions. It also can be used in solvent based adhesives.

STORAGE CONFITIONS:

Stored in Cool, dry and ventilated location. Protected from light and covered with nitrogen in container.

Shelf life: Two years with proper storage.
